| <b>Build Version</b>      | NA                                                                                                                                                                 |
| <b>Severity</b>           | Low                                                                                                                                                                |
| <b>Priority</b>           | Medium                                                                                                                                                             |
| <b>Reported By</b>        | Nilava (QA Automation Engineer)                                                                                                                                    |
| <b>Date</b>               | 13-April-2026                                                                                                                                                      |
| <b>Frequency</b>          | Always                                                                                                                                                             |
| <b>Precondition</b>       | User is logged into Athena onboarding quiz                                                                                                                         |
| <b>Steps to Reproduce</b> | <ol style="list-style-type: none"><li>1. Open the onboarding quiz page.</li><li>2. Navigate to Question 1</li><li>3. Observe the right-side panel header</li></ol> |
| <b>Actual Result</b>      | A number "1" is displayed at the top of the right panel, which is unrelated to the question or options.                                                            |
| <b>Expected Result</b>    | The number "1" should not be displayed, or it should be properly labelled if it represents a question number or score.                                             |

### Impact

This may confuse users as it appears unrelated to:

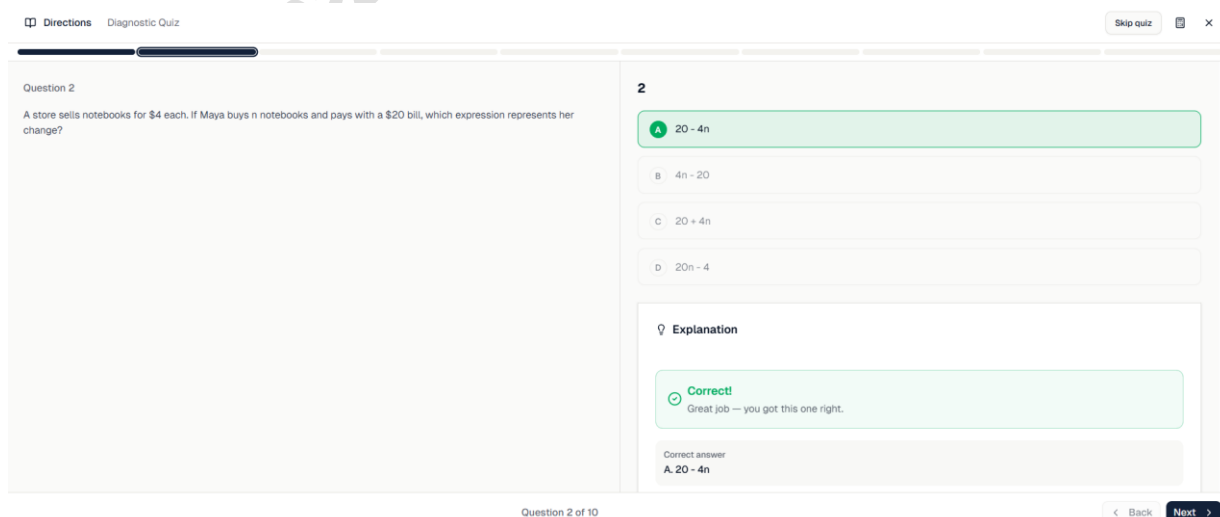

- Question number
- Selected option
- Score
- Progress

### Evidence / Screenshot

**Actual Result** Suggestion/lesson section does not appear.

**Expected Result** Suggestion should appear immediately after a wrong answer.

#### Impact

- Learning flow broken
- Users are not guided after mistakes
- Diagnostic quiz loses purpose
- Adaptive learning ineffective

| <b>Precondition</b> | User is logged into Athena onboarding quiz |
|---------------------|--------------------------------------------|

|                           |                                                                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Steps to Reproduce</b> | <ol style="list-style-type: none"><li>1. Open the onboarding quiz page.</li><li>2. Select the incorrect answer</li><li>3. Select another option</li></ol> |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|

|                      |                                            |
|----------------------|--------------------------------------------|
| <b>Actual Result</b> | User can change the answer multiple times. |
|----------------------|--------------------------------------------|

|                        |                                                                                                                                                                                           |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Expected Result</b> | Either: <ul style="list-style-type: none"><li>• Answer should lock after first selection</li></ul> OR <ul style="list-style-type: none"><li>• Clear feedback should reset logic</li></ul> |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Impact**

- Users can guess until correct
- Diagnostic accuracy compromised
- Score integrity broken
- Learning analytics incorrect

**Evidence / Screenshot**
